DATA ANALYTICS

IHDE IS COLLABORATING WITH KPI NINJA TO PROVIDE COMPREHENSIVE ANALYTICS SERVICES TO IHDE CUSTOMERS AND STAKEHOLDERS.

WHAT DOES IT DO?

This partnership provides comprehensive analytics on clinical, claims, social determinants of health, and other data types to provide reporting on population health, care management, value-base reporting, and performance measurement.

Using analytics to gain better insights can help demonstrate value and improve outcomes.

WHAT IS THE VALUE?

KPI Ninja is HEDIS and NCQA certified, and offers MIPS, HEDIS, and eCQM reporting. This tool aids in defining risks to different cohort groups so that clinicians can better understand their patient population and determine how to best allocate their resources to achieve positive health outcomes.

Achieve improved healthcare outcomes through data informed decisions.

Analysis, identification, and management of healthcare data helps provide the highest quality of care in the most cost-effective setting.
