

IHDE PARTNERS

IHDE IS WORKING WITH KEY PARTNERS TO IMPROVE THE RELIABILITY AND COMPLETENESS OF THE DATA FOR ITS STAKEHOLDERS

IMPROVED DATA RELIABILITY & ACCESS

IHDE provides a trusted health data platform supporting high-quality, longitudinal care records and an end-to-end data quality program for our stakeholders. By combining medical, behavioral, and social determinants of health (SDoH) information, IHDE hosts a robust super-dataset that goes beyond traditional health information exchange. Incorporating advanced data sharing capabilities, IHDE has become Idaho's trusted data trading partner, improving quality of health outcomes and reducing the cost of care.

Partnership with **MDM** provides a state of the art **FHIR enabled data warehouse** for aggregation and reuse.

Partnership with **Orion** provides a **clinical data portal** enhances IHDE's connection providing **more complete data from EHR systems**.

Partnership with **4Medica** provides **identity resolution**, assuring IHDE participants the **right data is captured at the right time, the first time**.

Partnership with **KPI** offers IHDE stakeholders the ability to better manage **key performance indicators** and achieve objectives through **data analytics**.

Partnership with **Aunt Bertha** connects people to **verified social care providers**, ensuring **social determinants of health data** is available and **integrated with medical health records**.

Remote Patient Monitoring & Telehealth

Partnership with **Connect America** provides Bluetooth-enabled devices to **remotely monitor, track and transmit** patient health data.

Partnership with **myHELO** provides a HIPAA compliant telehealth technology platform to provides a **web-based video application for telehealth visits**.
